

## MINIMUM SIZE FOR IPV4 TEMPORARY ASSIGNMENTS

RIPE 587

Edwin Verheul [edwin.verheul@surf.nl](mailto:edwin.verheul@surf.nl)

Elvis Daniel Velea [elvis@v4escrow.net](mailto:elvis@v4escrow.net)

# The Policy Proposal

- Current Policy
  - Utilisation rate of an assignment must be such that at least 50% of the total space applied for at the time of the temporary assignment will be concurrently used at peak periods during the assignment
- Additions
  - Recommendation to set temporary resource assignment size to a minimum of /24
  - Still allowing for a smaller assignment if requested by the End User.
  - Proposal also allows routing requirements to justify the request for more than a /24 for research purposes.

# Proposal status

- **Discussion Phase:**

- Started at 26th January
- 2<sup>nd</sup> version submitted based on feedback; Simplified paragraph 3.3
- A request for more than a /24 for research purposes may be justified by routing requirements when both the following conditions are met:
  - the research project details are made public upon registration of the number resources by the RIPE NCC.
  - the End User commits to making public the results of their research project free of charge and free from disclosure constraints.

- **2<sup>nd</sup> review phase started at 9<sup>th</sup> May and ends 29<sup>th</sup> of May**

- 7 supported the proposal

- **Impact analysis**
